

Giannis Zaoudis

Giannis Zaoudis is exploring market research with the eyes of an engineer by helping brands talk with consumers through Pollfish, a technology company which has access to over 150M smartphone users to whom it distributes surveys and questionnaires in order to get data and insights. Full stack engineer using the latest technologies from Angular and React to Scala and Play framework. Loves to learn new tools and technologies! Finally PhD candidate at CEID researching machine learning in the smartphone era.
